

URBAN WALKABOUT

UK Green Film Festival

This week the UK Green Film Festival launched its 6th annual celebration of environmental cinema. Until May 8, the film festival will screen some of the very best films from around the world, exploring some of the big environmental issues of the day through a mesmerising line-up of intelligent and topically relevant documentaries. The series will present UK premieres of *The Messenger* and *Deep Time* (Queen's Film Theatre), as well as the UK theatrical premiere of *Racing Extinction*. The festival's hand-picked selection of films will be accompanied by a programme of special events including Q&A sessions with Grant Baldwin, Louie Psihoyos, The Wildlife Trust, RSPB, Friends of the Earth and Frack Free South Yorkshire.
